

Choosing a **water efficient landscaper** is **just** as important as choosing water **efficient plants**.

Hire a Qualified Water Efficient Landscaper professional

Qualified Water Efficient Landscaper (QWEL) graduates have earned an EPA Water-Sense labeled certification that provides approximately 20 hours of education focused on water efficient principles, including irrigation system and landscape design with proper plant selection for the climate. Graduates also maintain continuing education hours.

To find a contractor to meet your needs, browse the attached list of regional QWEL professionals

***Please Note:** *The attached list includes landscapers who have graduated from the QWEL Program at Chino Basin Water Conservation District and is provided as an informational source only. Neither the order of the listings, nor the listing itself of a landscaper, implies any endorsement, recommendation or promotion of any particular listed landscaper, nor any guarantee of the workmanship or materials provided by the landscaper. It is the customer's sole responsibility to investigate the landscaper's background and experience. California Law stipulates that work performed for \$500.00 or more for labor and materials must be accomplished by a licensed contractor.*

For questions about the QWEL certification, please contact Chino Basin Water Conservation District.
